## THE NIGERIAN INSTITUTION OF MECHANICAL ENGINEERS- LETTER OF ENDORSEMENT

It is with great pleasure that the Nigeria Institute of Mechanical Engineers, NIMECHE, write to announce our endorsement as a proud supporter of the Heating, Ventilation, Refrigeration and Air-Condition, HVAC Expo West Africa organized by Elan Expo from 13-15<sup>th</sup> July at the Landmark Centre, Victoria Island Lagos. These sectors have shown growth potentials in Africa and Nigeria most especially with the increased demands and the growth of the Art of the HVAC Industry.

This is going to be a turning point for the growing HVAC industry in Nigeria which currently grows at over 5% annually and with a CAGR projection of 6.75%. The gathering will also be a place of intellectual and professional discourse regarding the growth of this industry in terms of how we can prepare Nigeria to fully take her place within this industry in West Africa and the entire Continent. We currently lead HVAC consumption in West Africa using almost 40% of all HVAC Products exported over the last 15 years.

It has been our pleasure to work closely with the organisers, ELAN Expo to ensure that its timing, scope, and vision align effectively with the art and science of the HVAC Industry. The sectoral expertise that the organisers bring to this event is second to none as a result of their experience and success in organizing HVAC events in other countries like United Arab Emirate, Iran, Uzbekistan, etc.

As such, the Nigerian Institution of Mechanical Engineers, NIMECHE, is proud to work with the organizers to host its first Heating, Ventilation, Refrigeration and Air-Condition Expo alongside the workshop and we invite stakeholders to attend from all corners of the federation and beyond.

Together we can make this a real platform for the growth and expansion of the HVAC industry in Nigeria and West Africa. Please join us in contributing to the building of Nigeria's diversified economy.

We look forward to welcoming you to Lagos Nigeria in July 2017.

Warm regards

For: **The Nigerian Institution of Mechanical Engineers**

Engr. Lucas Omotosho, FNIMECHE
